https://www.youtube.com/watch?v=LwNQlNnJfWIVideo can't be loaded because JavaScript is disabled: PLDT Fibr Full Admin Access (RP2613/ RP2627/ RP2646 /RP2684) | 2020 / 2021 / 2023 (https://www.youtube.com/watch?v=LwNQlNnJfWI)

Instructions

1. Open a web browser, type in the address bar **192.168.1.1/fh**
2. Enter the **FIBERHOMESUPERADMIN** credentials (see table above) then log in.
3. Click on the **debug switch** upon login and look for **Web-Admin Switch** toggle to enable then hit the apply button.
4. Logout from the FIBERHOMESUPERADMIN account.
5. Type once again on the URL 192.168.1.1/fh
6. Enter the ADMINPLDT credentials (see table above) then log in.
    - **NOTES**:
    - If you get an error of **invalid password/credentials** make sure you are copying without any space from the table above.
        - Check if your software version is the same with the credentials you're copying.
        - For **HG6245D**, check the **RP2602** credentials above. If the *adminpldt* doesn't work try resetting your modem by pressing on the small pinhole beside the WPS button on your router then try again.
    - If you see "**Someone is already logged in**", simply restart your modem.
    - If you have a different version or router other than mentioned above it is not guaranteed to work. Feel free to ask on the forums on this website or comment below (signup / login using Facebook or Google account).

This may or may not work for you since PLDT changes the credentials once in a while so if this worked for you leave a comment below or if you have discovered a new credentials that worked for you feel free to share it to FST Community by commenting below, or posting a thread in the forum or through YouTube comments or Facebook.
