Top 10 Best VPN for Android 2021

With the rapid growth of businesses and the service industry, it has become more important for greater data security and privacy over the internet. Since most private data over the internet are easily accessible for third parties, it has become mandatory to keep the data from going to the wrong hands. For this reason, VPN services have evolved rapidly to take over the challenges of data secrecy and privacy, and there are a few very reliable services that give complete protection.

Below is the list of **Top 10 Best VPN on Android 2021**, which is the ideal choice for users and is very fast, reliable for outstanding high bandwidth activities, and very secure. Apart from these, the VPNs given below give the best live chat support and other added features.

1. Express VPN

The Express VPN service is very popular with a large percentage of customers. The biggest advantage is that it works on most major platforms, including Android. Users can easily find it as a stable connection for uninterrupted works. It also comes with Chrome, Firefox, and Edge extension, and there is no fear of any data leaks. There is a strong no-data policy, and the whole system is pretty encrypted. Currently, the Express VPN has around 3000 servers in 94 countries. You will also find a diversely distributed fleet of servers. It has a stylish interface and offers Split tunneling.

You can also find out about the service with their offer for a 30-day money-back guarantee which is reasonable.

2. Surfshark

The Surfshark is very good for beginners, especially due to its fast VPN service. It has very strong and privacy features and a 24/7 live chat service. It has chrome and Firefox extensions, and there are no user logs, and it is very secure for anyone or any business to get on with their worry-free work. You also get it free for 30 days so that you can make a decision. It is rather simple to use with lots of features, and plans start very low and therefore quite affordable to most users.

Users would be able to use simultaneous connections and unique multi-hop and split tunneling tools. It has well-designed tools to make work simple and interesting.

3. Private Internet Access

Private Internet Access is easy to use and is based in the USA. There is no data limit with this service, and users would find it supporting 10 devices at once, and there are also several easy-to-use apps. Users would also find that some streaming services are left unblocked, like Netflix, BBC iPlayer, Amazon, and YouTube. Currently, Private Internet Access has more than 35,000 servers in over 75 countries. Users are also offered 30 days trial period by which time they can decide as the service has military-grade encryption. It is also compatible with Android, Windows, Mac, iOS, and Linux.
