Step-by-Step

1. I-Open ang wifi at mag connect sa wifi network nyo sa bahay. (Preferrably 5 Ghz kung malapit ka sa router o malakas ang signal otherwise connect to 2.4 Ghz wifi instead)
2. Pumunta sa Settings > Wifi o sa ibang android / smartphone device simply long press the wifi icon.
3. Long press the wifi network na gamit nyo o kung saan kayo naka connect.
4. Select "Modify Network".
5. Sa IP Settings, palitan ng static instead of dynamic.
6. Bumaba sa setting o i scroll hangang makita ang DNS 1 at DNS 2.

7. Palitan ang dns 1 ng 1.1.1.1 at and dns 2 ng 1.0.0.4
8. Ang mga dns na ito ay “Cloudflare DNS” na so far pinaka mabilis na query speed sa lahat ng authoritative dns servers. (Benchmark by DNSPerf)
9. Click the save button pakatapos ilagay ito at obserbahan kung nag improve ang pag load ng webpages, browsing at overall internet speed sa inyong mobile phone/device.
