Step-by-Step Guide

1. Open up *Windows Security*, Navigate to *Device Security* > *Core Isolation* > *Memory Integrity*. Set the Memory Integrity option to **OFF**.
2. Go [here](#) and download **Microsoft Update Assistant Tool** to update from Windows 10 version 1903 or 1909. NOTE: Windows 10 must be at least 1903 or 1909 for the tool to be able to detect and upgrade to 2004 version.
3. Download and open up the tool and proceed with the installation. (It will check system hardware requirements, etc) then proceed with the download and installation.
4. Restart your computer once done and proceed with update installations.
5. Viola! You have Windows 10 2004 update installed on your

machine properly!
