

Update Release: Windows 10 KB4550945 for Windows Update fix

A new optional update for Windows 10, versions 1909 and 1903, has been released which addresses issues causing Windows Update crashes, unresponsiveness, and the behavior where the lock screen stops appearing.

KB4550945 update was categorized as optional non-security update and was part of the optional monthly "C" releases of Windows 10 which is for quality improvements.

The optional non-security KB4550945 update was published as part of the optional monthly "C" release and it only comes with Windows 10 quality improvements.

Other upcoming optional updates starting May 2020 can be located in the Windows message center [announcement](#) with regards to the other windows optional C and D update releases.

Installation

The optional update [KB4550945](#) will be automatically installed using the Windows Update however if your Windows Update is not working properly, you can also install it manually by going to the [Microsoft Update Catalog](#).
